

IBM DIRECTOR JUMPSTART

Need high value, low cost Systems Management?

Yorel can JumpStart your efforts

With an IBM Director Jumpstart from Yorel, you can receive **timely alerts** on hardware and environmental issues before they impact your systems. Yorel will provide a foundation for **hardware management** that allows your IT staff to more **proactively** deal with potential hardware issues. IBM Director also creates a foundation for software deployment, server standardization, and high availability, **saving you time and money**.

Objectives:

- Quick and successful implementation of IBM Director server and agents
- Knowledge transfer of IBM Director, best practices & common issues
- Consider the relevant uses and provide recommendations

Process:

- Present and discuss IBM Director technology, uses & licensing
- Install IBM Director server on a supported Windows or Linux based system
- Perform a server discovery on the local area network
- Install and configure IBM Director agents on client servers
- Configure initial Event Action Plans for hardware alerts
- Verify alert functionality with simulated failures
- Troubleshoot any issues that arise and explain best practices

Deliverables:

- Installation documentation, customized for your environment
- Documented agent installation levels

Additional Options:

- Integration of SNMP devices for additional alerting capabilities
- Monitoring of VMware servers and VM's inside of the Director framework
- Upwards integration with other systems management frameworks
- Implementation of optional IBM Director modules such as Capacity Manager, Electronic Service Agent, IBM PowerExecutive, etc.
- Combine with Yorel's BladeCenter JumpStart for rapid blade deployment
