

# SERVER CONSOLIDATION & CONTAINMENT STUDY

## Get Control of your Server Infrastructure Today

Yorel's proven methodology integrates the best practices of Gartner, IBM, VMware, and years of industry experience to produce a custom virtualization roadmap. Your organization can be assured that you are implementing the right technologies, in the most effective way to **save time** and **reduce costs**.

### Process:

- The agentless CDAT tool will discover the servers on your network
- CDAT will then collect performance metrics for 7 days
- Yorel will extract the resource requirements of the servers
- We will determine the best consolidation strategy for each candidate Virtualization, Blades, Clusters, etc.
- We will aggregate the candidates and determine the best platforms Scale-out (Blade Center), Scale-up (x-Architecture) and/or hybrid
- We will perform a customer TCO analysis and determine a real ROI Savings usually >\$1M/3yrs and ROI typically <12 months
- We will provide an implementation plan to ensure project success
- We will present our findings and customize the results with your feedback

### Deliverables:

- Raw server inventory and performance data for review
- Excel Workbook with detailed analysis allows further customization
- PowerPoint Presentation summarizes results and recommendations

### Additional Options:

- Have a large environment? We can collect data on any number of servers or locations. We will work in the smallest and largest of environments.
- Want a more complete picture of your environment? We can collect and analyze data for 30, 60 or 90 days. Your choice.

### Customer References:

- Utility company saves \$1.5M & received 11mo of ROI
- Manufacturer saves \$2.5M & received 5mo of ROI
- Medical center saves \$1.2M & received 8mo of ROI
- Many others
