

VMWARE INFRASTRUCTURE HEALTH CHECK

Is your virtual environment fully optimized?

Maximize ROI and decrease TCO through optimal configuration based on Yorel's Best Practices

Yorel's experience with VMware VI3 and other complimentary solutions enables you to quickly determine if you are reaping all of the benefits of virtualization. An optimized Virtual Infrastructure **saves time and money.**

Objectives:

- Quick and thorough evaluation of an existing virtualization environment
- Knowledge transfer of VMware best practices & common issues
- Consider the relevant uses and provide recommendations

Process:

- Audit VirtualCenter configuration
- Audit ESX Server host configurations including patches, storage partitioning, network configuration and additional services
- Review performance of infrastructure resources and identify bottlenecks
- Review licensing and evaluate upgrade readiness in older environments
- Discuss Yorel Best Practices and your unique requirements
- Report discrepancies between Yorel Best Practices and the current implementation

Deliverables:

- All presentation materials for further review within your organization
- VMware and Yorel Best Practices documentation
- Written recommendations and summary notes

Additional Options:

- Concerns over specific functionality or process? We can customize your Health Check to meet your specific requirements.
- Don't yet have a virtualization platform? Yorel can ensure that your infrastructure strategy is optimized and complete, starting with a study.
- Yorel has integration and support services available to assist with any issues that are uncovered during the Health Check.
