

# YOREL ENTERPRISE SUPPORT FOR STORAGE INFRASTRUCTURE

## Proactive storage maintenance without the distraction

Continually updating, monitoring, and measuring the health of your storage infrastructure can be a complex and tedious ongoing process. A Yorel Enterprise Service (YES) agreement for storage can alleviate these distractions allowing Yorel to bring our storage experience and **best practices** to your environment so that you can focus on strategic business objectives, **saving you time and money**.

### Objectives:

- Document and publish current configurations if your storage environment
- Review your storage infrastructure to determine its overall health
- Ensure that your storage is running at peak efficiency
- Provide recommendations on future infrastructure optimizations
- Ensure your storage infrastructure is current with firmware and updates

### Process:

- Document key components within your storage infrastructure
- Monthly performance and capacity analysis of primary storage devices
- Quarterly firmware updates and asset management
- Annual review of enterprise storage strategy

### Deliverables:

- All documentation and diagrams posted to customized, secure portal
- All services documented for further review within your organization
- Written recommendations and summary notes

### Additional Options:

- Want to implement or revise your data protection strategy? Yorel can provide consulting sessions to assist with backup and DR planning.
- Migrating from a legacy storage infrastructure to the latest technology? We provide products and services to assist with data migration.
- Consultants available for discounted hourly services, at a predetermined rate, in addition to scheduled YES services
