Highlights

Yorel Integrated Solutions focuses on the design, implementation and support of solutions based on technologies from Citrix, VMWare and our other technology partners.

Citrix: Access 4.0 is the next generation of three Citrix product lines: Citrix Presentation Server™, Access Gateway™ and Citrix Password Manager™. Learn more about the capabilities behind 4.0 that include:

SmartAccess
SmoothRoaming
Instant Collaboration
On-Demand Assistance

Robust and Resilient Foundation
End-to-End Visibility
Integrated Identity Management
Secure by Design

VMWare: In addition to simplified management and instant server provisioning, one of the real advantages to using virtual server technology today is the economies of scale that can be realized with resource sharing. Learn the benefits of utilizing VMWare in a Citrix environment.

IBM: xSeries servers featuring Intel® Xeon processors provide outstanding availability and price/performance capabilities that help better manage and provision your IT environment.
