

Yorel360

An Optimization Event

» Event Information

The Enterprise Cloud... What is it and why should you care?

- Elastic, flexible, scalable
- A utility approach to capacity and services
- Strategic services, not tactical responses
- Abstraction: Providing SLA's, not technology
- Virtualizing IT Services

Join Yorel as we discuss ways to implement your **Enterprise Cloud**. Learn how you can transform the way your business consumes your IT service, whether you are building an internal cloud or buying an external cloud service. Yorel has the experience and thought leadership to implement what is real today, while we continue to explore newly emerging technologies. We're excited to share our knowledge with you - join us for an interactive discussion!

Yorel 360 is a once-a-year educational event for our customers and prospects. You will learn about Yorel's solution focus areas and the services integrated with those solutions. We will be hosting educational sessions, data center tours and we will have demonstration booths available for our customers and prospects to participate in some hands-on activities.
