IS IN THE BOARDROOM

Keep your data center cool and cut costs with green solutions from Yorel

Some estimates say companies pay 50 cents in energy costs for every dollar of hardware they have in their data centers. Not only is the pressure on to cut consumption for cost reasons, there's also pressure due to environmental concerns.

Yorel's data center design and optimization experts can help you cut costs by up to 40 percent. To help you "go green," we can evaluate your IT infrastructure and your HVAC systems for inefficiencies, and then recommend practical, long-term solutions like hardware and software virtualization, and IBM BladeCenter systems.

Join us on Dec. 5, 2007 to learn more about how Yorel can help you go green. [Click here to register](#) or for additional information, email yorel1@yorel.com today.
