Hybrid Computing: Combining Cloud and On-Premise Solutions for Optimal Efficiencies

Will cloud computing complement – rather than replace – traditional local computing? Is Hybrid Computing the future of technology?

Join Yorel for an afternoon reviewing real-world demonstrations of computing solutions which combine the best of on-premise and cloud based solutions. Yorel has the experience and thought leadership to implement what is real today while we continue to explore newly emerging technologies. We're excited to share our knowledge with you – join us for an interactive discussion!

Yorel360 is a once-a-year educational event for our customers and prospects. You will learn about Yorel's solution focus areas and the services integrated with those solutions. We will be hosting educational sessions and data center tours with demonstration booths available for participation in hands-on activities.

Attend
Yorel360
for a
chance to
win an
iPad 2!

3:30 - Virtualization in the Cloud

Live demonstration of cloud server and storage provisioning to see the utility model of cloud computing at work. After you attend this session, you will be clear regarding the difference between hosted solutions and cloud services.

4:30 - Its All About the IOPS

With ever increasing storage needs in our environments, how do we correctly balance the need for large storage repositories while supporting applications that demand high disk performance?

5:30 - Application Virtualization and Delivery

Want to learn the impact of Application Virtualization and Delivery in today's IT environment and what it means to IT? Interested in learning where we are headed with desktops as a service? Attend this session to see how Yorel tailors Application Virtualization solutions to the needs of the customer's business and user community.
